

OpenCart E-commerce Application – Test Plan Summary

Document ID: TP-OC-DEMO-2025

Date: 2025

Prepared by: Harishkumar M

1.0 Document Overview

This document defines a focused testing strategy for the OpenCart frontend demo application located at <https://demo.opencart.com/>. The purpose is to ensure the quality and stability of core user workflows through a structured testing process.

2.0 Overview & Scope

2.1 In-Scope (Core Functional Workflows):

- User Registration
- Login / Logout
- Product Search
- Product Compare
- Product Display Page
- Add to Cart
- Wishlist
- Shopping Cart
- Checkout

2.2 Test Environment:

- **OS:** Windows 11
- **Browser:** Google Chrome

3.0 Test Strategy

3.1 Test Case Design Techniques:

- Equivalence Partitioning
- Boundary Value Analysis
- Use Case Testing
- Exploratory Testing

3.2 Testing Process:

1. **Smoke Testing:** Verify build stability before detailed testing.
2. **Functional Testing:** Execute test cases for all scoped modules.
3. **Regression Testing:** Re-test affected areas after defect fixes.
4. **End-to-End (E2E) Flow Testing:** Validate complete user journeys (Register → Login → Search → Add to Cart → Checkout).

4.0 Defect Reporting Procedure

- All defects will be documented in a standardized Excel template.
- Each defect report will include detailed, reproducible steps and supporting screenshots.
- Daily defect summary reports will be shared with all relevant stakeholders.

5.0 Roles and Responsibilities

Role	Responsibilities
Test Manager	Handle escalations and overall project oversight.
Test Lead	Create test plan, coordinate execution, manage reporting, and serve as primary client contact.
Test Engineer(s)	Create and execute test cases, log defects, and perform retesting.

6.0 Test Schedule

Phase	Start Date	End Date
Test Plan Creation	[Start Date]	[End Date]
Test Case Creation	[Start Date]	[End Date]
Test Execution (5 Modules)	[Start Date]	[End Date]
Final Summary Report Submission		[Submission Date]

7.0 Test Deliverables

- Test Plan Document (This Document)
- Functional Test Cases (Excel)
- Daily Defect Reports (Excel)
- Final Test Summary Report (Excel)

8.0 Entry and Exit Criteria

8.1 Entry Criteria:

- Signed-off Test Plan.
- Signed-off Test Cases.
- A stable test build is available and accessible.

8.2 Exit Criteria:

- All test cases for scoped modules have been executed.
- All critical and major defects have been resolved and re-tested.
- Defect Log and Final Test Summary Report have been completed and delivered.

9.0 Tools

- **Microsoft Excel:** For test cases, defect logging, and summary reporting.

10.0 Risks and Mitigations

Risk	Mitigation Strategy
Resource unavailability	Identify and assign backup resources in advance.
Unstable test environment/build	Focus on test case and documentation refinement until a stable build is provided.
Tight project timelines	Prioritize critical test scenarios. Ramp up resources if necessary and approved.

11.0 Approvals

Testing activities will commence only after formal client approval of the following documents has been received.

Document	Approver Name & Signature	Date
Test Plan		
Test Cases		
Final Reports		

End of Document

1. User Registration

- Validate the working of Register Account functionality
- Validate the working of Forgot Password functionality (optional, as it's often tied to user login)

2. User Login / Logout

- Validate the working of Login functionality
- Validate the working of Logout functionality

3. Product Search

- Validate the working of Search functionality
- Validate the Product Display Page functionality for the different types of Products
- Validate the working of Product Compare functionality (optional, if your module supports it)

4. Add to Cart

- Validate the working of 'Add to Cart' functionality
- Validate the working of 'Wish List' functionality (optional, if part of cart module)
- Validate the working of 'Shopping Cart' functionality

5. Checkout Process

- Validate the working of Checkout functionality
