

Note(OpenCart -Test Plan.pdf)

OpenCart Test Plan Summary

Document Overview

The document titled "OpenCart - Test Plan" was prepared by Pavan on January 10, 2021, and outlines a comprehensive testing strategy for the OpenCart frontend application, specifically the functionalities available on the demo site at "<https://demo.opencart.com/>".

Table of Contents

The test plan includes a detailed table of contents covering various aspects such as:

- Overview
- Scope
- Inclusions
- Test Environments
- Exclusions
- Test Strategy
- Defect Reporting Procedure
- Roles and Responsibilities
- Test Schedule
- Test Deliverables
- Pricing
- Entry and Exit Criteria
- Suspension and Resumption Criteria

- Tools
- Risks and Mitigations
- Approvals .

Overview and Scope

The document serves as a high-level test planning document detailing the scope of the project, which includes testing functionalities such as:

- User registration
- Login and logout processes
- Password recovery
- Product search and comparison
- Shopping cart functionalities
- Checkout processes
- Account management features .

The testing will be conducted across various environments, including Windows 10 (Chrome, Firefox, Edge), Mac OS (Safari), and mobile platforms (Android and iOS) . Notably, the scope excludes third-party features, payment gateways, and test automation .

Test Strategy

The testing strategy focuses on functional testing of the specified features. The approach includes:

1. **Creation of Test Scenarios and Test Cases:** Utilizing techniques such as Equivalence Class Partition, Boundary Value Analysis, and Exploratory Testing .
2. **Testing Process:** Initial smoke testing will determine if the application is stable enough for in-depth testing. If smoke testing fails, the build will be rejected .

3. Types of Testing: The testing will encompass smoke testing, regression testing, usability testing, and end-to-end flow testing .

Defect Reporting Procedure

Defects will be documented meticulously, including steps to reproduce and screenshots. Daily reports will summarize defects and observations encountered during testing .

Roles and Responsibilities

The document outlines specific roles within the testing team:

- **Test Manager:** Responsible for escalations.
- **Test Lead:** Creates the test plan, interacts with the application, and coordinates test execution.
- **Senior Test Engineer:** Creates and executes test cases.
- **Test Engineer:** Executes test cases and reports defects .

Test Schedule and Deliverables

A structured test schedule is provided, detailing tasks such as test plan creation, test case execution, and report submissions . Deliverables include:

- A comprehensive test plan
- Functional test cases
- Daily defect reports
- Summary reports categorizing bugs by various criteria .

Entry and Exit Criteria

The document specifies entry and exit criteria for each phase of the Software Testing Life Cycle (STLC):

- **Requirement Analysis:** Entry requires receipt of requirements documents; exit confirms understanding of requirements .
- **Test Planning:** Entry requires signed-off test plan; exit confirms that test scenarios and cases are also signed off .
- **Test Execution:** Entry requires readiness of the application; exit confirms completion of test case and defect reports .

Tools and Risks

The testing will utilize various tools, including a bug tracking tool and documentation software . Potential risks identified include resource availability and build stability, with corresponding mitigation strategies such as backup resource planning and dynamic resource allocation .

Approvals

The testing process is contingent upon client approvals for various documents, including the test plan and test cases. Testing will only proceed once these approvals are secured .

In summary, the "OpenCart - Test Plan" document provides a thorough framework for testing the OpenCart frontend application, detailing the scope, strategy, roles, and processes necessary to ensure a quality product.

Of course. Here is the provided OpenCart Test Plan Summary formatted into a structured, professional document, ready for conversion to PDF.

OpenCart Frontend Demo – Test Plan Summary

Document ID: TP-OC-DEMO-2025 **Version:** 1.0 **Date:** 2025 **Prepared by:**
Harishkumar

1.0 Document Overview

This document defines a focused testing strategy for the OpenCart frontend demo

application located at <https://demo.opencart.com/> . The purpose is to ensure the quality and stability of core user workflows through a structured testing process.

2.0 Overview & Scope

2.1 In-Scope (Core Functional Workflows):

- User Registration
- User Login / Logout
- Product Search
- Add to Cart
- Checkout Process

2.2 Test Environment:

- **OS:** Windows 11
- **Browser:** Google Chrome only

2.3 Exclusions:

- All features not listed above.
 - Mobile device testing.
 - Browsers other than Chrome.
 - Third-party plugins/modules.
 - Payment gateway integration testing.
 - Automation testing.
-

3.0 Test Strategy

3.1 Test Case Design Techniques:

- Equivalence Partitioning

- Boundary Value Analysis
- Use Case Testing
- Exploratory Testing

3.2 Testing Process:

1. **Smoke Testing:** Verify build stability before detailed testing.
 2. **Functional Testing:** Execute test cases for all scoped modules.
 3. **Regression Testing:** Re-test affected areas after defect fixes.
 4. **End-to-End (E2E) Flow Testing:** Validate complete user journeys (e.g., Register → Login → Search → Add to Cart → Checkout).
-

4.0 Defect Reporting Procedure

- All defects will be documented in a standardized Excel template.
 - Each defect report will include detailed, reproducible steps and supporting screenshots.
 - Daily defect summary reports will be shared with all relevant stakeholders.
-

5.0 Roles and Responsibilities

Test Manager	Handle escalations and overall project oversight.
Test Lead	Create test plan, coordinate execution, manage reporting, and serve as primary client contact.
Test Engineer(s)	Create and execute test cases, log defects, and perform retesting.

6.0 Test Schedule

Test Plan Creation	[Start Date]	[End Date]
Test Case Creation	[Start Date]	[End Date]
Test Execution (5 Modules)	[Start Date]	[End Date]
Final Summary Report Submission	-	[Submission Date]

7.0 Test Deliverables

- Test Plan Document (This Document)
- Functional Test Cases (Excel)
- Daily Defect Reports (Excel)
- Final Test Summary Report (Excel)

8.0 Entry and Exit Criteria

8.1 Entry Criteria:

- Signed-off Test Plan.
- Signed-off Test Cases.
- A stable test build is available and accessible.

8.2 Exit Criteria:

- All test cases for scoped modules have been executed.
- All critical and major defects have been resolved and re-tested.
- Defect Log and Final Test Summary Report have been completed and delivered.

9.0 Tools

- **Microsoft Excel:** For test cases, defect logging, and summary reporting.
-

10.0 Risks and Mitigations

Resource unavailability	Identify and assign backup resources in advance.
Unstable test environment/build	Focus on test case and documentation refinement until a stable build is provided.
Tight project timelines	Prioritize critical test scenarios. Ramp up resources if necessary and approved.

11.0 Approvals

Testing activities will commence only after formal client approval of the following documents has been received.

Test Plan	-	
Test Cases	-	
Final Reports	-	

End of Document
